

Job Title: Hazardous Materials Instructor

Essential Duties and Responsibilities:

- Collaborate in the development of the project funded by the Pipeline and Hazardous Materials Safety Administration (PHMSA) pursuant to the grant, including the training modules and curriculum to supplement and not supplant the training requirements of employers for the train-the-trainer segment, the train railroads segment, and drills and exercises segments of the project.
- Assist in the training of hazmat employees to provide them with an understanding of the risks involved in handling hazardous materials, to ensure all relevant training requirements are met, and to make certain that hazmat employees will be equipped to ensure their own safety as well as the safety of others.
- Be conversant with and able to use adult education methods in the project.
- Perform all responsibilities while traveling as required.
- Participate in training, as requested.
- Represent the SLSI's mission, vision and goals accurately to stakeholders and demonstrate professionalism consistent with the expectations of the SLSI.

Job Knowledge, Skills, Abilities, Other Characteristic (KSAOs):

- Highly knowledgeable and experienced in hazardous materials regulations
- Hands-on experience in the railroad industry
- Possess a knowledge of adult learning techniques and be able to implement them in a classroom environment
- Willing to travel: length of travel varies
- Effective communication skills, both verbally and in writing
- Organized and able to gather, prepare, and present materials in an understandable fashion
- Adaptable; comfortable with dynamic, diverse environments and comfortable with last minute changes
- Willing and able to work in a collaborative fashion, fostering positive interactions with students and fellow Instructors
- Possesses a high degree of professionalism and integrity
- Effectively utilizes computer applications
