JILL MEDEIROS ASSUMES NEW ROLE AS CHIEF ADMINISTRATIVE OFFICER FOR THE SHORT LINE SAFETY INSTITUTE

WASHINGTON – February 24, 2026 – The Short Line Safety Institute (SLSI) announces the promotion of Jill Medeiros to Chief Administrative Officer.

“Over the past decade, Jill has strengthened and enhanced the processes that ensure SLSI operates at an exceptionally high level. From managing an expanding grant portfolio and improving team onboarding, to overseeing our accounting and auditing functions and coordinating workflow with legal counsel, her contributions have been both wide-ranging and invaluable. There is virtually no process within the organization that has not benefited from Jill’s insight, leadership, and execution,” said Tom Murta, Executive Director, SLSI. “In addition, Jill’s grant management expertise is consistently recognized by our funding partners as best in class. This well-deserved promotion reflects both the significant contributions she has made to the organization and the expanded scope of her leadership.”

Reporting to the Executive Director, the Chief Administrative Officer will be responsible for compliance with the Federal Code of Regulations, part 200 and the entire lifecycle of federal grant awards, from application to close-out. In addition, Ms. Medeiros will oversee the day-

to-day operations of the SLSI, including developing and improving policies and procedures to ensure smooth operations, financial reporting, and grant compliance.

“The Short Line Safety Institute provides a critical service to the industry by focusing on improving railroad safety through strengthening safety culture. It has been a pleasure to be part of a team that has impacted more than 25,000 railroaders through Safety Culture Assessments and supported 1,000 organizations with Hazardous Materials Training. I look forward to continuing to advance our impact,” said Jill Medeiros.

###

About SLSI - The Short Line Safety Institute (SLSI) is a non-profit corporation that conducts Safety Culture Assessments, and Hazardous Material Instructor, Leadership Development and Structured Problem Solving programs. The SLSI is the educational, training and research source for short line and regional railroads concerning safety culture.
